

Gartner Clients Are Raving About Microsoft Sentinel

Hear directly from Gartner clients on why Sentinel stands above other SIEM solutions to support cyber threat detection, compliance and incident management

Outstanding integration capabilities

“Truly a revolutionary and wholesome SIEM which outshines some well renowned other solutions by several notches. It’s perfectly integrated with complete MS ecosystem (nothing strange there), and it provides a plethora of features to keep an eye on and secure the digital environment.”

A next-gen, cloud-based SIEM solution

“Microsoft Sentinel is the next-gen cloud based SIEM platform. Unlike traditional SIEM, it doesn’t need additional installation. Can be used on the go to analyse and review logs from cloud workloads. This cloud-based SIEM is a must for today’s cloud-based workloads. Microsoft’s industry expertise is an added advantage.”

Flexible and customisable

“Truly a revolutionary and wholesome SIEM which outshines some well renowned other solutions by several notches. It’s perfectly integrated with complete MS ecosystem (nothing strange there), and it provides a plethora of features to keep an eye on and secure the digital environment.”

Secure, fast data collection and analysis

“MS Sentinel, has been an amazing solution, it has given us a secure platform and fast data analysis, especially when we need to check for large amount of data. What make us feel calm is the way the data is being secured. It helps us collect data, with a high standard security to detect threats and investigate for any suspicious activities.”

Endless possibilities for alert rules

“It’s fantastic for creating alert rules on almost anything that you want. As long as you have data connectors and logs fed-in, the possibility for rules are endless. Like all SIEMs, it does take time to configure to your environment but after doing so, it runs amazingly. Sentinel also has great live streams and hunting capabilities.”

Heavy investment by Microsoft

“We have had a great experience with Sentinel. As one of the first customers we certainly have seen the product evolve at an impressive pace over the past several year. The product team is continuing to build new services at an aggressive pace as MSFT invests heavily into the future of this technology.”

Capabilities that exceed the competition

“It’s fantastic for creating alert rules on almost anything that you want. As long as you have data connectors and logs fed-in, the possibility for rules are endless. Like all SIEMs, it does take time to configure to your environment but after doing so, it runs amazingly. Sentinel also has great live streams and hunting capabilities.”
